Dear PIs,

Please note the following **new upper management requirement for your science highlights:**

The Corresponding Author, and the funding source, for the associated publication will need to be identified on the PPT slide in a “bubble” that could later be removed if desired. If the Corresponding Author is from BES other 2 divisions: **Chemical Sciences, Geosciences, and Biosciences (CSGB)** or **Materials Sciences and Engineering (MSE)**, the **Scientific User Facilities (SUF)** PM will need to identify the PM who they spoke with to determine that this work should go forward as an SUFD highlight.

We will review what are the appropriate elements to include in the metadata.

Thanks for complying (\*),  
Eliane

PS: Do spare me the trouble of having to send the highlight back, asking for clarification.
